Serial No.: 10/670,378

IN THE CLAIMS

- 1-5. canceled
- 6. (currently amended) A method of making an <u>emulsified</u> absorption base comprising:
 - a) heating white petrolatum up to 80°C; and
- b) adding an effective amount of methyl glucose dioleate to the white petrolatum and mixing the two components together to form [[the]] an absorption base; and
 - c) diluting the absorption base with water preheated to up to 50 °C to form the emulsified absorption base for skin use alone or skin use when the emulsified absorption base is combined with other ingredients.
- 7. (original) The method of claim 6, further comprising adding a preservative system to the absorption base to form a preservative system-containing absorption base.

8. canceled

9. (currently amended) The method of claim 6, further including adding an effective amount of a hydrocortisone or a hydrocortisone salt to the <u>absorption</u> base.

10-16. canceled

Serial No.: 10/670,378

- 17. (currently amended) A method of making an <u>emulsified</u> absorption base comprising:
 - a) heating white petrolatum up to 80°C; and
- b) adding an effective amount <u>a non-lanolin based emulsifier that falls</u>
 within the range of 3 HLB units of the HLB value of petrolatum (HLB 4) of the emulsifier
 of claim 10 to the white petrolatum and mixing the two components together to form
 the absorption base; <u>and</u>

diluting the absorption base with water preheated to up to 50°C to form an emulsified absorption base for skin use alone or skin use when the emulsified absorption base is combined with other ingredients.

- 18. (original) The method of claim 17, further comprising adding a preservative system to the absorption base to form a preservative system-containing absorption base.
 - 19. canceled
- 20. (currently amended) The method of claim 17, further including adding an effective amount of a hydrocortisone or a hydrocortisone salt to the <u>absorption</u> base.

Serial No.: 10/670,378

(currently amended) The method or base of claim [[3]] Z, wherein the 21. preservative system is DMDM hydantoin [[(and) Iodo]] and iodo propynyl butyl carbamate.

22-25. canceled

(currently amended) The method of claim 7, further including adding an 26. effective amount of a hydrocortisone or a hydrocortisone salt to the absorption base.

27-36. canceled

(currently amended) The method of claim 18, further including adding an 37. effective amount of a hydrocortisone or a hydrocortisone salt to the absorption base.

38-40. canceled

The method or base of claim 18 wherein the 41. (currently amended) preservative system is DMDM hydantoin [[(and) Iodo]] and iodo propynyl butyl carbamate.
